

Basis SMEFTsim_general (EFT SMEFT)

Basis used in the `SMEFTsim_general` UFO models, version 3.0.0 or later. Implements Warsaw basis with generic flavor indices for all fermions. q, u, d are the left- and right-handed quark fields. ℓ, e are left- and right-handed lepton fields. Quark fields are in the up-aligned basis. This basis definition corresponds to a fixed `LambdaSMEFT=1e+3` in the UFO models. Notation and conventions can vary compared to the Warsaw basis paper, see arXiv:2012.11343 for all definitions.

Sectors

The effective Lagrangian is defined as

$$\mathcal{L}_{\text{eff}} = -\mathcal{H}_{\text{eff}} = \sum_{O_i=O_i^\dagger} C_i O_i + \sum_{O_i \neq O_i^\dagger} (C_i O_i + C_i^* O_i^\dagger).$$
